

Ahimsa Partners

Bridging the world

*Regional and Inter-Regional Alliances
Brasilia, 19-20 November 2012*

Today, health issues, a key factor in a country's development, extend beyond national borders and require global action. Emboldened by this, **Ahimsa Partners** has decided :

✓ To refocus its activities on Health Diplomacy and direct its efforts to supporting the different stakeholders around the world and advocating on Global Health issues:

www.ahimsa-partners.com

✓ To set up a new endowment fund: **Ahimsa Fund**, specializing in Health Anthropology. **Ahimsa Fund** will use its expertise to assist the world's poorest people. Its mission will be to develop social entrepreneurship projects aimed at improving access to health for everyone. Each year, the Fund will organize an international event (**Ahimsa Round Table: ART**) on a topic relating to global health. The forthcoming edition will be held on 16-19 June 2013 at Fondation Mérieux Center in Annecy, France, on '**Global Health and Faith-Based Communities**'.

Global Health Diplomacy:

The aim of Global Health diplomacy is to promote dialogue amongst public-health stakeholders and to find new models and mechanisms of funding to improve access to healthcare for everyone, everywhere.

The mission of Ahimsa Partners is to promote dialogue amongst health actors around the world through innovative partnerships, through regional and inter-regional alliances.

Such an approach must reinforce the idea that our differences are strengths on which we must build our future, not weaknesses behind which we have to hide.

*Brasilia - 2nd International Workshop Accessible Quality-assured diagnostics Test for Public Health Programs
19-20 November 2012*

Today the global IVD landscape is the following :

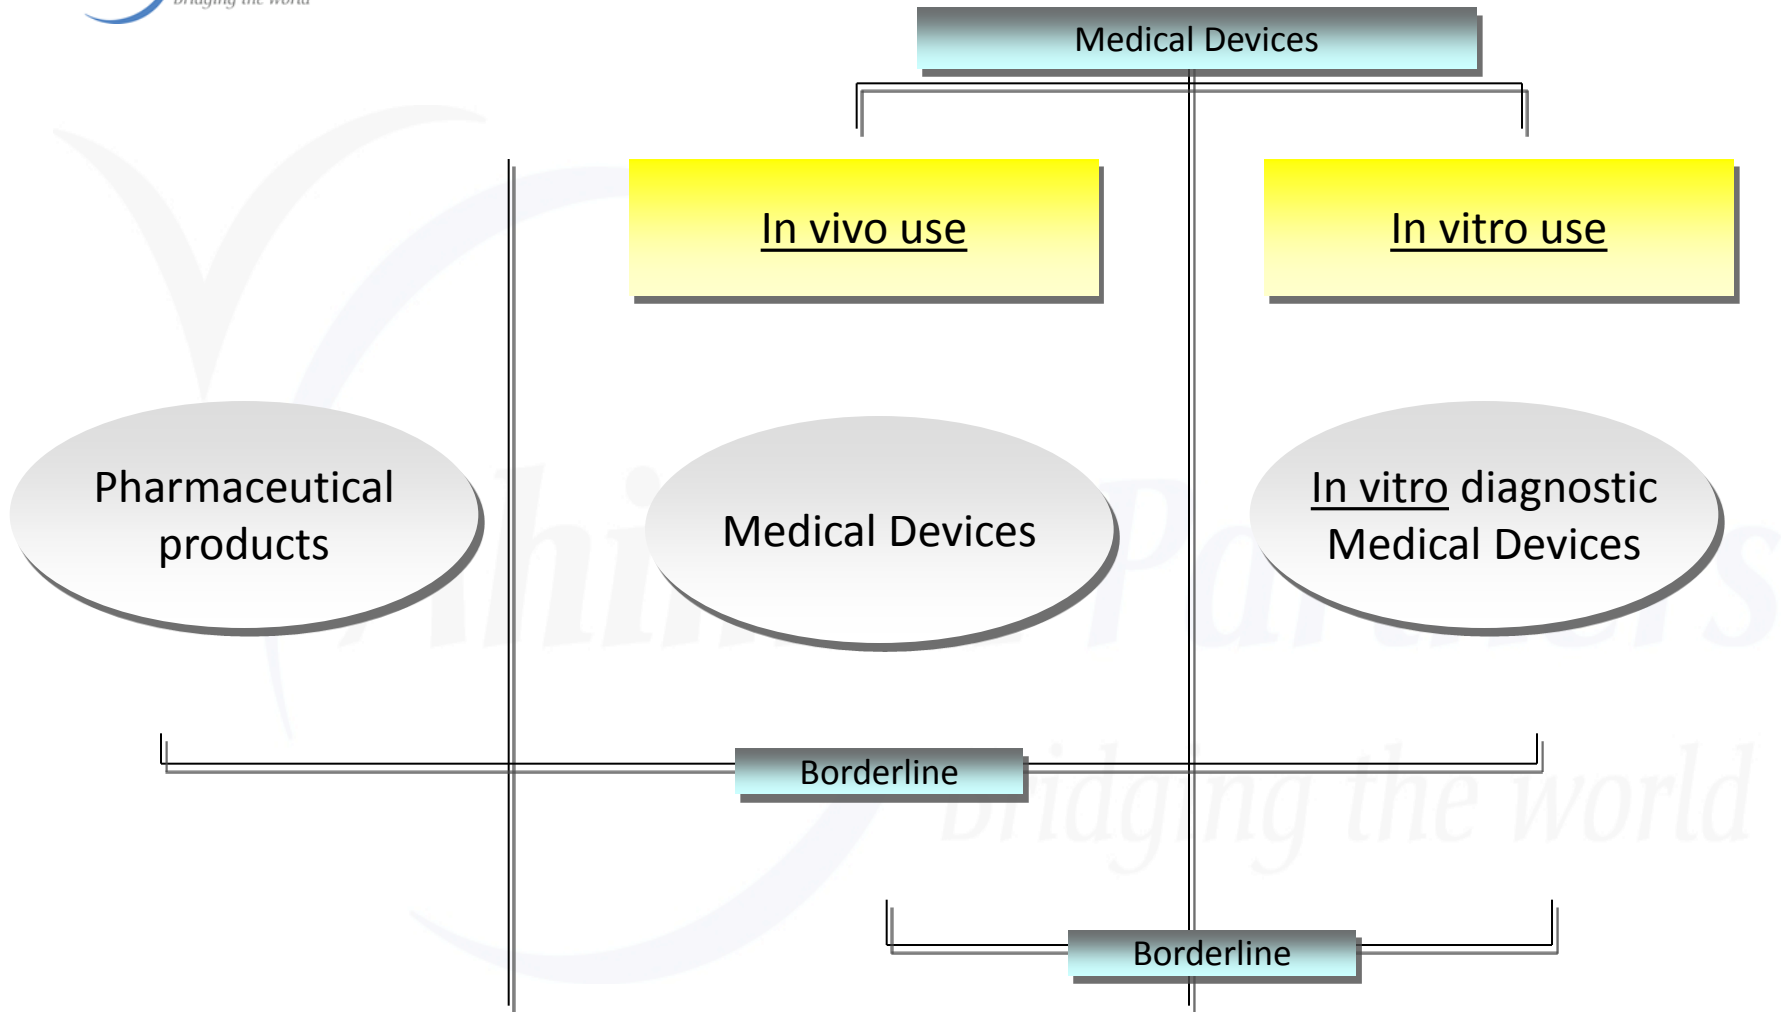

- ✓ **The global diagnostic business is around 39 billions US\$, of which 40% US, 33% Europe, 13% Japan,**
- ✓ **20% of the worldwide population represents 80% of the global market in sales. The 15 Top Ten companies deliver 80% of the worldwide turnover,**
- ✓ **80% of the today worldwide market is split around 20% of the worldwide population ?**

✓ **Advocacy**

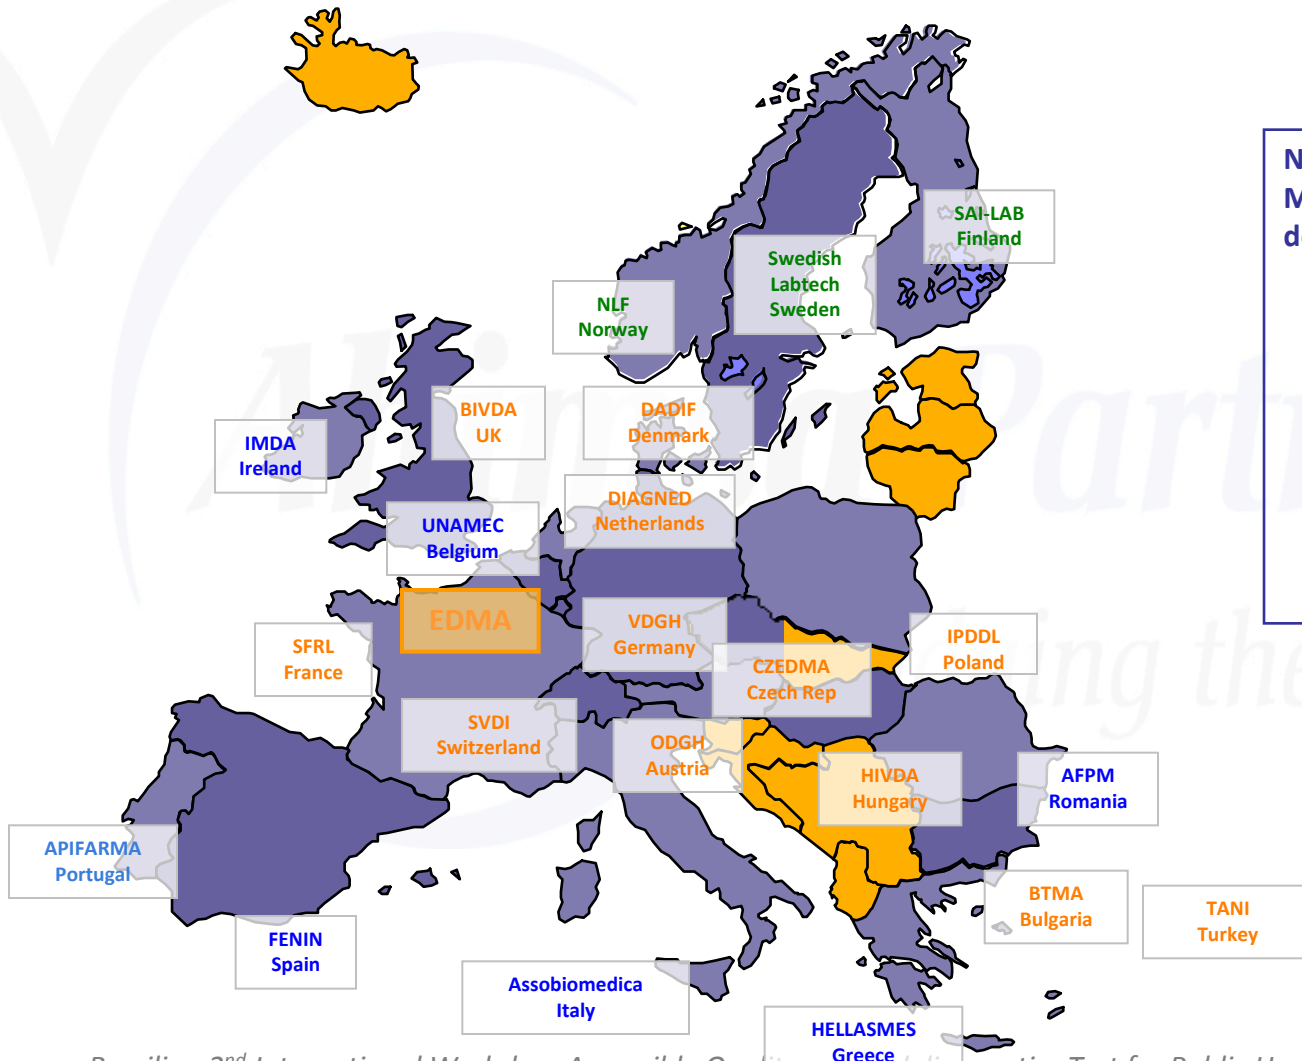

Diagnosics for the benefit of the individual patient is undervalued by the major stakeholders in the world. The Lewin report on the Value of Diagnostics noted that while diagnostics comprise less than 1.6% of all USA Medicare costs, their findings influence 60-70% of health care decision-making.

All major players present

Proposed Activities

- ✓ Provide a Global Alliance for Diagnostics for discussion, for public health issues,
- ✓ Propose a way to create a strong partnership initiative bringing together IVD associations from all over the world,
- ✓ Identify, articulate and facilitate research needs related to diagnostics and best practice,
- ✓ Improve harmonization of national/regional/inter regional regulation of diagnostics,
- ✓ Develop/coordinate purchase funds for public sector programs,
- ✓ Contribute to new initiatives like Technology Transfer, distribution and others...
- ✓ Bring expertise and advising to the Diagnostic landscape in the global health landscape,
- ✓ Propose and work on new and innovative financial initiatives to speed the development of new diagnostics,
- ✓ Innovative models : PPP, ppP.

***Yes, with “revolutionary”
innovative models, we can
change the landscape and
strongly impact Global Health.***
